## BACK BY POPULAR DEMAND

**Increases your efficiency: The all-rounder with 120x greater lifespan\* thanks to patented bit technology, suitable for all screws** (\*compared to market leading standard bits).

Lowers your costs and saves time: Bit quick and easy to find thanks to red marking – even in dark environments by using an UV light. Thanks to its fluorescent coating; this reduces the number of bits which are lost and saves on the expense of acquiring new ones.

Until now, when buying bits it hasn't been very easy to determine which bits are suitable for which applications. We have put an end to this complexity of considering the appliance used, the fastening type and the large selection of different bits with a new bit concept meaning only the screw shape is the deciding factor when selecting the right

bit. Universal in its use, the multitiered TY bit is suitable for all types of screws – both T-shaped and Y-shaped screws – and thus the ideal tool for fastenings in all kinds of materials.

Thanks to its torsion zone, the bit is also suitable for power tools and impact screwdrivers guarantees an on average 120x greater lifespan compared to standard bits.
